## **DETAILED ACTION**

1. This office action is in response to applicant's amendment filed 10/17/02, wherein claims 1-2, 5-10, and 12-18 were amended.

### ***Drawings***

2. The proposed drawing correction, filed on 10/17/02 has been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 14-15 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Chaiken et al., U.S. Patent 5,333,111, as set forth in paragraph 6 of paper number 4.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chaiken et al. as set forth in paragraph 8 of paper number 4.

Art Unit: 3724

7. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chaiken et al. as set forth in paragraph 9 of paper number 4.

***Allowable Subject Matter***

8. Claims 1-13 appear to be allowable over the prior art of record.

***Response to Arguments***

9. Applicant's arguments filed 10/17/02 have been fully considered but they are not persuasive.

Applicant contends that functional language must be given patentable weight and that the claims have been amended to emphasize structural requirements, which are not disclosed or suggested by the cited prior art. However, the examiner respectfully disagrees. It should be noted that it is not that the functional language/intended use recitations are ignored but rather accorded patentable weight to the degree they warrant. In this case, e.g., recitations of specific functions are merely intended uses of the claimed structure. The reference feature identifier is nothing more than a sensor and the sensor of Chaiken et al. is fully capable of intended use recitation. What structure is being claimed that is different from Chaiken et al.? How is it different such that it is allowed to perform this function? Moreover, the limitation of a controller is nothing more than a computer and all computers are capable of performing a myriad of functions. The computer of Chaiken et al. is fully capable of the recitations found in the claims, e.g., the ability to enlarge the field of view of the main sensor. How is the controller of the instant application any different from the computer of Chaiken et al.?

Art Unit: 3724

It should be noted that it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations.

10. For the reasons above, the grounds of rejection are deemed proper.

***Conclusion***

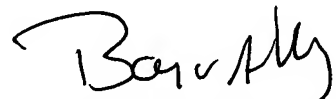

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
